

ENVIRONMENTAL POLICY

EP-BELT DOO LOZNICA is dedicated to the production of technical fabrics in a responsible and sustainable manner. We recognize that our supply chain, processes and products have a direct and indirect impact on the environment. We strive to identify aspects of the environment and find effective ways to remove or reduce their impact. Our goals are aimed at achieving continuous improvements in environmental management. Regulatory compliance is the minimum standard we meet. We will implement additional environmental programs to exceed regulatory compliance where possible.

We have set clear goals that are regularly reviewed to ensure that our activities successfully fit into the environmental policy.

Our goals in environmental management are:

- To identify all aspects of the environment and the impacts they have on operations, processes and stakeholders.
- To assess significant aspects and impacts in order to ensure functional environmental management at all levels.
- To ensure adequate assessment and compliance with environmental aspects and impacts when making key decisions related to the supply chain, processes and new product development.
- To establish measurements of the significant impacts of our processes and operations on the environment and make continuous improvements and constantly analyze and evaluate progress in areas including but not limited to energy, greenhouse gases, water use and quality, waste, product uses, materials and the impact on product life.
- To use energy and natural resources wisely and efficiently. reduce waste and use recycled resources when possible.
- That we apply the principles of circular economy in our business.
- To make a significant contribution to reducing climate change and water pollution by reducing GHG emissions and water impact throughout the entire product life cycle by applying the rules of national and international agendas when setting goals.
- To collaborate with our customers, suppliers and other stakeholders on environmental and sustainability issues in our supply chain.
- To ensure that our employees have knowledge and understand their responsibilities related to the environment and are aware of the actions they can take to reduce the negative impact on the environment.
- To carry out a review of the environmental policy and evaluate the achievement of the set goals, and to make those evaluations publicly available in the sustainability report.

The environmental policy is communicated, explained and available to all interested parties and the public.
